Snap-Stick™

Ready to Use Culture Swabs

- Pure cultures in an easy to use swab stick
- Ideal for media QA or development of cell banks
- Simple snap valve releases hydration fluid into swab unit where pellet is contained. Dissolves the pellet in less than a minute.
- Robust and traceable – derived from pure NCTC cultures and never more than 2 passages from the reference culture
- No royalty fee added to invoice

User Friendly - All in one Solution

Pure bacterial culture in an easy to use swab stick. Simple snap valve design releases hydration fluid with a simple press of the plastic valve stem. Cultures are supplied in flash dissolve format, dissolving without agitation or incubation in less than 1 minute. Fast, convenient and glass free hydration reservoir. Store refrigerated.

Traceable and Close to the Source

Derived from pure NCTC strains and never more than 2 passages from the reference culture. This ensures maximum traceability and performance.
